The screenshot shows the 'Create Rule Criteria' dialog box in the Oracle Retail Inventory Optimization (RIO) application. The dialog is titled 'Create Rule Criteria' and has a close button (X) in the top right corner. It contains two main sections: 'Filter Column Names' and 'Selected Columns'.

The 'Filter Column Names' section has a text input field that is currently empty. Below it is a table with the following columns: 'Column Name' and 'Add All'. The table lists several columns with their corresponding 'Add' buttons:

Column Name	Add All
Location 1 - Company	Add
Location 2 - Chain	Add
Location 3 - Area	Add
Location 4 - Region	Add
Location 5 - District	Add
Location 6 - Location	Add
Location Group	Add

The 'Selected Columns' section has a title 'Selected Columns' and a 'Clear Selections' button. Below the title is a text input field with the placeholder text 'Add columns from the list to build your query.'.

At the bottom of the dialog are two buttons: 'OK' and 'Cancel'. The 'OK' button is highlighted with a red border.

In the background, the 'Create Life Cycle Classification Rules' page is visible. It shows a sidebar with 'Rules Category' and 'Rule Builder' sections. The 'Rule Builder' section has a 'Rule Criteria' tab selected. The main content area shows a table with columns 'Start' and 'End' and rows for 'Initial Allocation', 'Inactive', 'Maturity', and 'End of Life'. The 'Initial Allocation' row is highlighted.
